

# AGRA "Gen-El" Bucket Elevators

- Unique **"Interlocking" Cup Design** prevents back-legging.
- Standard **Belt Speeds start @ 75 FPM** for extremely gentle product handling.
- **"Plastic-Coated" Cups** to gently handle your products
- **"Louvered" Inlet** to maximize cup filling efficiency & minimize product damage.
- **"No Cup Chains Required"** Standard elevator belting on all models greatly reduces elevator maintenance costs.
- **"Gen-El Applications"** include Seed, Dry Edible Beans, Pet Food, Feed Pellets, Salt Pellets, & any other dry, fragile product.
- **Capacities** available from 260 BPH to 2,390 BPH.
- **"Mild Steel or Stainless Steel"** construction is available.
- **"PVC, Rubber, or Food Grade PVC Belting"** is available to accommodate any application.
- **"Pet Food Testing"** has shown a dramatic reduction in product damage compared to standard bucket elevators running @ reduced belt speeds.

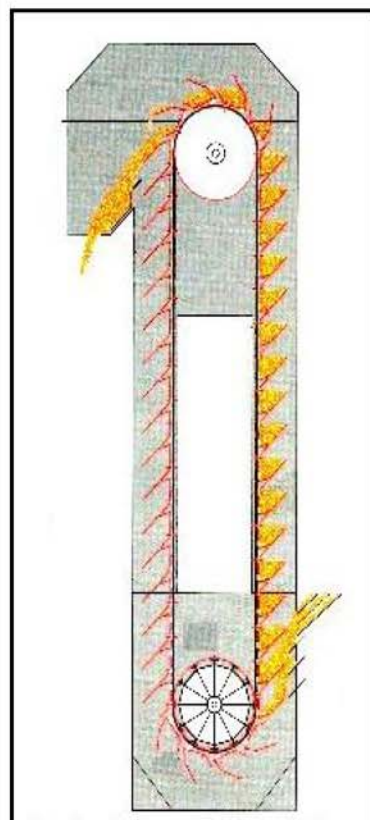

Extremely Gentle Product Discharge with Interlocking "Plastic-Coated" Steel or SS Cups

Louvered Inlet w/ Side Skirts to Maximize Cup Fill Efficiency & Minimize Product Damage in Boot

## GEN-EL

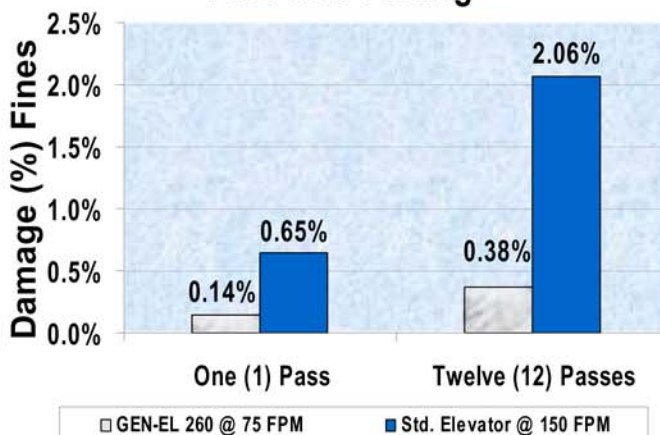

Principle of Operation

### Approximate Elevator Costs (600 BPH x 30' DH)

### Pet Food Testing
